# PRIMERO PROJECT

Romania

Framework

A platform designed to register unaccompanied children. An open-source software that facilitates the quick identification, registration, and monitoring of unaccompanied children arriving from Ukraine who may be in transit or temporarily residing in Romania. Centralizes information about organized accommodations or communities hosting families with Ukrainian children or Ukrainian children accompanied by adults other than their parents.

Target-group

→ Unaccompanied children from Ukraine.

Coordination

→ National Authority for the Protection of Children's Rights and Adoption (ANPDCA).

Implementation

→ General Directorate of Social Assistance and Child Protection (DGASPC).
→ Operates at the national level with the support of UNICEF Romania.

Outcomes

January 2023
15,480 Ukrainian children were registered in *PRIMERO*; social workers from 41 county-level child protection authorities were trained in *PRIMERO*, and 317 tablets were purchased and distributed to volunteer teams for *PRIMERO* registration activities.

February 2023
19,726 Ukrainian children had been registered in *PRIMERO*, and 795 service providers had been trained in child protection.

May 2023
27,049 Ukrainian children had been introduced into the *PRIMERO* app records.

June 2023
28,020 Ukrainian children had been introduced into the *PRIMERO* app records.

Potentialities

Enables early detection of potential abuse, neglect, or trafficking situations, ensuring necessary measures are taken to secure and protect the children's rights. Collects data on parents or any adults accompanying children, their needs, their residence status in Romania, and access to health, education, or social protection services. The initial assessment establishes a risk level, after which children are referred to the appropriate authorities and services.
