

SkillLab helps you turn your skills into careers.

How can you do that? With **SkillLab**, you can:

01

Discover and document your skills

Enter your work, education and life experiences on our platform and we will reveal the skills you never knew you had in your toolbox.

02

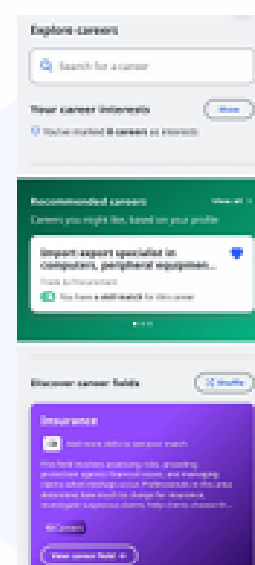

Automatically create your CV

We build your personalized CV in multiple languages and help you show your unique skill set to employers. You don't have to write it yourself.

03

Uncover multiple career paths and help you plan your career better

Know which skills you need for different careers and see how well you match them. Regardless of your career stage, SkillLab is here to be your career GPS.

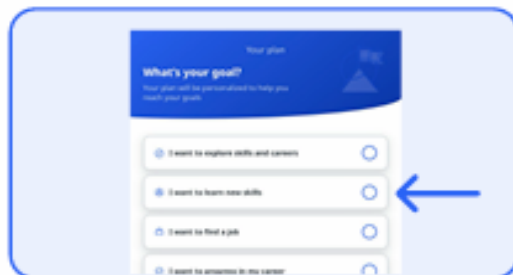

Using SkillLab is really simple.

Step 1

Create your profile

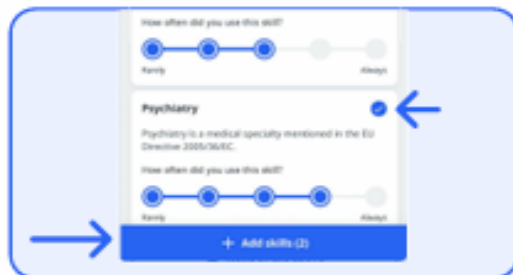

Once you receive an invitation to join SkillLab, create your account by clicking **Get Started** and enter your sign up details.

Step 2

Choose your goal and get a plan

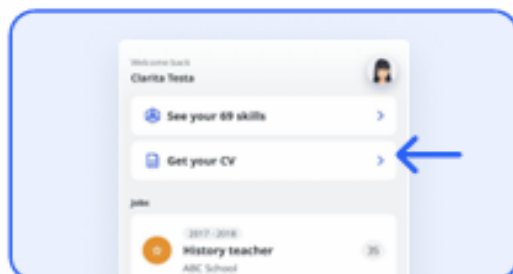

Setting a goal helps SkillLab understand your needs and personalize your work. You can always review your progress and see how far you have come and what to do next. The plan helps you navigate the app to achieve your goal.

Step 3

Add your experience

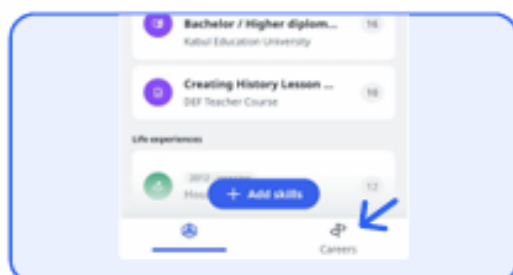

Add information about your **professional, educational, and life experiences** to your profile. SkillLab will suggest a selection of skills that you could gain from the added experience. Mark all the skills you have with a "+" sign and indicate how often you use them. Add skills until the progress bar at the top is full.

Step 4

Upload your resume

Review your information and tick the additional information you want to include in your resume. Review your personal details and choose your preferred design and format, as well as the language in which your resume will be written. You can create resumes for different professions.

Step 5

Explore multiple careers and how they match your skill set

Open the **career tab** and browse through different fields and careers. Click on the heart icon to mark your career interest. You can also click the career card to see the skills you need for the career and how well your skill set matches it.

Easy, right? We hope you enjoy your journey on SkillLab and feel more confident about the skills you have afterwards! If you are ever feeling stuck, please access our [Help Center](#).
