

interRAI COVID-19 Vulnerability Screener

Powered by Raisoft.

The interRAI COVID-19 Vulnerability Screener (CVS) is a brief self-reported instrument that can be used to identify persons who may be especially vulnerable during the pandemic. The CVS is a self-reported survey tool that can be used with older adults and adults with disabilities to identify the presence of COVID-19 symptoms, frailty, and major comorbidities that increase mortality risk related to COVID-19.

Quick and Easy

Software

Assessment

25 questions covering COVID-19 symptoms, health conditions, cognition, loneliness, family stress, diagnosis/disease, financial situation, hospital and emergency room or doctor visits.
