<b><u>Principles of the European Pillar of Social Rights:</u></b> <i>Check the 20 principles <a href="#">here</a>.</i>	<input type="checkbox"/> 1. Education, training, life-long learning <input type="checkbox"/> 2. Gender equality <input type="checkbox"/> 3. Equal opportunities <input type="checkbox"/> 4. Active support to employment <input type="checkbox"/> 5. Secure and adaptable employment <input type="checkbox"/> 6. Fair Wages <input type="checkbox"/> 7. Transparent employment conditions <input type="checkbox"/> 8. Social dialogue <input type="checkbox"/> 9. Work-life balance <input type="checkbox"/> 10. Healthy, safe work environment	<input type="checkbox"/> 11. Childcare and child support <input type="checkbox"/> 12. Social protection <input type="checkbox"/> 13. Unemployment benefits <input type="checkbox"/> 14. Minimum income <input type="checkbox"/> 15. Old age income and pensions <input checked="" type="checkbox"/> 16. Health care <input type="checkbox"/> 17. Inclusion of people with disabilities <input checked="" type="checkbox"/> 18. Long-term care <input type="checkbox"/> 19. Housing and assistance to homeless <input type="checkbox"/> 20. Access to essential services
<b><u>Current status of the practice:</u></b>	<input type="checkbox"/> Concept and Design Phase <input type="checkbox"/> Execution & Monitoring Phase <input checked="" type="checkbox"/> Consolidation Phase <input type="checkbox"/> Scaling Up and Transformation Phase <input type="checkbox"/> Other (please specify)	
<b><u>Context/ Social issues addressed</u></b>	The "All in One Sensor" project- is a project that incorporates monitoring, learning and prediction functions and advances in the construction of predictive and cognitive telecare of the future. The proposal is based on the installation of a set of	

<p><i>Please explain the problem you attempt to solve.</i></p>	<p>non-intrusive sensors to monitor the behaviour of people in their homes and alert them when there is a deviation in their habits or behavioural patterns. Deviations related to energy consumption, not leaving the room, walking much more slowly, doing activities late at night, etc., could indicate a worsening of health conditions, whether physical, cognitive, mental or emotional, in older people living alone. The scheme also develops a virtual programme for the prevention of cognitive deterioration that allows action to be taken when a cognitive deterioration alert occurs.</p>
<p><b><u>Objectives:</u></b> <i>Please provide a maximum of three objectives in bullet points.</i></p>	<p>Based on the alerts detected, the aim is for the telecare service:</p> <ol style="list-style-type: none"> <li>1. to be able to intervene early, more quickly and efficiently and, in the long term, to build a holistic service for monitoring behavioural habits that will enable the management of public policies for the allocation of services adapted to the reality of each territory of a predictive nature.</li> <li>2. to stimulate and maintain cognitive functions through a programme of exercises and monitoring of cognitive areas for people in situations of fragility, disability or dependence who are users of the Barcelona Provincial Government's Local Telecare Service.</li> </ol>
<p><b><u>Activities:</u></b> <i>Please summarise the activities put in place to achieve the objectives (maximum 200 words).</i></p>	<p>The All-in-one sensor:</p> <ul style="list-style-type: none"> <li>• It configures a new behavioural habit management service via the installation of a host of sensors fitted inside homes.</li> <li>• It offers advanced monitoring, learning and prediction functions.</li> <li>• It allows resources to be set in motion: a digital cognitive stimulation platform.</li> <li>• This is an Artificial Intelligence (IA) project based on the Internet of Things (IoT): devices “speak” to one another beyond the two-way connection of each device with the terminal.</li> </ul>
<p><b><u>Evaluation of practice:</u></b> <i>Please explain how you evaluate the practice and what the results were/are so far</i></p>	
<p><b><u>Links to supporting documents:</u></b> <i>e.g. website or report of the practice</i></p>	<p><a href="https://www.diba.cat/es/web/teleassistencia/que-es-la-teleassistencia">https://www.diba.cat/es/web/teleassistencia/que-es-la-teleassistencia</a></p>
<p><b><u>Comments and tips</u></b> <i>i.e. for people willing to use your Practice</i></p>
